OPTIMUM COMFORT

**Give your interiors
a touch of natural elegance.**

Soltis Touch combines aesthetic qualities with high levels of thermal, acoustic and light protection performance.

5%

Transparency maintained to take full advantage of the exterior view and natural light.

A touch of singularity ousting uniformity and neutrality.

A uniquely natural effect created by an exclusive weave combining different materials and colours.

Soltis Touch plays with light, creating chromatic effects and interplay of transparencies designed to give character to your interiors.

Solar protection becomes an essential part of your interior design.

3%

The ideal combination of aesthetics, thermal, visual and acoustic comfort.

A UNIQUE WEAVE FOR A 100% NATURAL LOOK

1%

The ideal solution for controlling glare and enhancing acoustic comfort.

SUPERIOR PERFORMANCES FOR RELAXING INTERIORS

Thermal performance

Soltis Touch excludes up to 91% of incoming heat to maintain a stable interior temperature in summer without increasing air conditioning requirements. This enhances user comfort and building energy performance.

Visual comfort

Soltis Touch maintains outward views and uninterrupted natural light while protecting from glare.

Acoustic performance

Soltis Touch reduces reverberation, thereby improving the occupants' acoustic comfort. The fabric absorbs up to 45% of the noise within a 100 mm air gap.

Fire safety

Soltis Touch meets international standards for fire rating standards and does not contribute to flashover.

Health safety

Soltis Touch fabric is guaranteed totally phthalate-free. It is certified Greenguard Gold, proving the fabric complies with the most stringent indoor air quality standards. It therefore contributes to creating a healthier interior.

TS : Solar Transmission (%)

RS : Solar Reflection (%)

AS : Solar Absorption (%)

TS + RS + AS = 100% of incident energy

TV n-h: Normal-hemispherical visible light

*Detailed method EN 13363-

The transmission and reflection values above are based on the spectral values of the glass combined with the screen. These are used to calculate the g_{tot} value.

**Type "C" glazing is an insulating double glazing with low-e coating in position 3 (4 mm + 16 mm space + 4 mm float; Argon-filled) $g = 0.59$ – $U = 1.2$.

***Type "D" glazing is solar control double glazing with a low-e coating in position 2 (4 mm + 16 mm space + 4 mm float; Argon-filled) $g = 0.32$ - $U = 1.1$.
